## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 27 March 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_.

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Upon further consideration the Examiner hereby withdraws the restriction requirement set forth in the Office Action mailed 6 March 2007. Claims 1-9 are rejoined and fully examined for patentability below.

### ***Specification***

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 7-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear from claim 7 whether the entire amount of addition product only a part of which has been adjusted for molar degree of addition is employed in the subsequent polymerization or whether only that part which has been so adjusted is employed. Claim 7 and its dependents are therefore rendered indefinite.

### ***Claim Rejections - 35 USC § 102***

Art Unit: 1621

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Hirata et al (US 6,174,980-B1 01-2001). Hirata discloses (Column 9, line 64-column 10 line 25) the sequential addition of 10 moles of ethylene oxide per mole of 3-methyl-3-buten-1-ol followed by a second addition of ethylene oxide to the first product to give a product containing 35 moles of ethylene oxide per mole of 3-methyl-3-buten-1-ol. ). Hirata discloses (Column 9, line 64-column 10 line 25) removing a part of the first addition product before carrying out the second addition. For the purposes of this rejection the Examiner considers that portion is equivalent to "part" and may include the entire amount (or part) from which a "portion" is specified. Hirata discloses (Column 11, lines 18-44) a similar process using methanol as the starting alcohol and the product alcohol is converted into the corresponding methacrylate ester by known methods. Hirata is silent concerning the water content of the methanol and the Examiner, therefore, presumes that none is present. Hirata discloses (Column 12, line 65- column 13, line 37) the co-polymerization of this methacrylate with methacrylic acid to give a copolymer. Hirata therefore anticipates claims 1-9.

**Conclusion**

5. Claims 1-9 are pending. Claims 1-9 are rejected
